NOTICE OF ALLOWANCE

Allowable Subject Matter

1. Claims 36-38, 40-42, and 53-65 are allowed.
2. The following is an examiner's statement of reasons for allowance: The present invention is drawn to a method of processing a semiconductor where the method includes monitoring a supply of slurry to the processing system via a particular turbidity sensor. Obeng et al. (6,048,256) disclose an apparatus and method for continuous delivery and conditioning of a polishing slurry, and teach that the mixing chamber 110 may include a turbidity monitor, however, Obeng et al. fail to disclose the particular turbidity sensor of the present invention. A turbidity sensor is typically employed in dishwashers, see applicant's IDS's of record, and there appears to be advancement in the design of these turbidity sensors. However, regarding the processing of semiconductors, it is the examiner's opinion that the art of record considered as a whole, alone or in combination, neither anticipates nor renders obvious monitoring the turbidity of the slurry during the supplying with the turbidity sensors as claimed in independent claims 36, 53, 58, 61, 62, and 64, together in combination with the rest of the limitations of the independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the
